kirbytext Cheat Sheet

Markdown, as used in Kirbytext

http://daringfireball.net/projects/markdown/syntax

Emphasis

```
*italic* or _italic_
**bold** or __bold__
```

Headings

```
# Header 1
## Header 2
### Header 3
#### Header 4
##### Header 5
###### Header 6
```

Line Breaks

Lines are automatically broken :
```
A first paragraph full of Lorem
ipsum, ut fermentum massa justo sit
amet risus.
a second line.

A new paragraph.
```

Blockquote

Each new line starts with a bracket
```
> A first paragraph, full of Lorem
ipsum, ut fermentum massa justo sit
amet risus.
> a second line.

>> Nested blockquote

> __all the styles work !__
```

Links

Inline use:
```
[example](http://example.com)
```

Reference use:
```
This is the [example][id]
```
followed (anywhere in your document)
by the link definition :
```
…
[id]: http://example.com "title"
```
(titles are optional)

Links can be automatically translated:
```
<http://example.com>
<contact@example.com>
```

Images

Inline use:
```
![alt text](/imagepath/img.jpg
"title")
```

Reference use:
```
![alt text][id]
```
followed by the link definition :
```
…
[id]: /imagepath/img.jpg
```

Horizontal Rules

```
*** or ---
```

Ordered lists

Use numbers. The order of numbers isn't important:
```
1. First item
2. Second item
2. Third item
```

Unordered lists

Use dashes, asterisks or plus signs:
```
* An item
* Another item
* Yet another item !
```

Nested lists

Lists can be nested:
```
+ Spices
  1. Cardamom
  2. Ginger
+ Fruits
  - Apple
  - Orange
+ Vegetables
  * Tomato
  * Zucchini
```

Kirbytext

http://getkirby.com/blog/text-formatting-101

Links

```
(link: http:example.com)
(link: http:example.com text: Example)
(link: http:example.com popup: yes)
(link: http:example.com title: Example title)
(link: http:example.com class: mylink)
```

Relative links:
```
(link: pages/example text: Example)
(link: articles/another-example)
```

Email links:
```
(email: contact@example.com)
(email: contact@example.com text: send an email!)
```

Twitter links:
```
(twitter: example)
```
This will link to @example's profile. If no text is provided, it will display the twitter username with a @.

Media embeding/linking

Image displaying:
```
(image: img.jpg)
(image: img.jpg width: 120 height: 200)
(image: img.jpg alt: alt text)
(image: img.jpg class: myclass)
(image: img.jpg link: another.jpg)
(image: http://flickr.com/img.jpg)
```

File linking:
```
(file: examplefile.pdf text: example PDF)
```

Video embeding:
```
(youtube: http://youtube.com/watch?v=lLuc6rtWkrM)
(vimeo: http://vimeo.com/3432886)
```
